

PRECISION CIPP

Fitting Liner

Launch Package

FROM START TO FINISH. WATERTIGHT STARTS HERE.

Don't rely on the integrity of the host pipe. Take charge of the repair by offering a watertight solution with the PJS Fitting Liner

PJS Fitting Liner

Pipe fittings are one of the most vulnerable points of a sewer system and are often the cause of leaks. By installing a fitting liner that overlaps your primary liner, you leave a seamless connection to eliminate catch points and extend the life of the liner

Address fittings in 2"-6" with a durable PJS liner. Available in 45°, 65°, and 90° configurations

Repiper PJS Fixtures are durable and handmade for reuse up to 100 times

Electric powered steam unit with increased mobility to handle multiple installs

The right tool for the job. Includes accessories tailored for fitting liner installation

Restore strength where it matters most

Enhance your reinstatement to create a watertight solution

Cured with steam. The speed of UV without the price tag

Avoid callbacks by addressing the most common point of leaks

Engineered to resist common sewer/drain chemicals & corrosive conditions

REHABILITATE TODAY. PROTECT TOMORROW.

Equip your trenchless team with branch fitting liners in 2"-6" pipes using Repiper's proven steam-cure process. Engineered for reliability and precision. Fitting liners provide a seamless transition where two pipes connect, helping deliver a fully-lined and watertight system.
