PRECISION CIPP

SCOUT PACKAGE

Prepare every project with confidence.

Designed to support the critical first steps of pipe rehabilitation, this package enables contractors to film, descale, and document drain and sewer systems before lining operations begin.

Comprehensive system assessments help ensure improved quality control and long term project success.

No more surprises. No more delays.

Start every rehabilitation project with a clear understanding of the system.

By establishing an accurate picture of the pipe conditions and layout, contractors can plan more effectively, improve efficiency, and avoid unexpected setbacks that can eat into profits..

Become an expert at filming, descaling, and mapping out pipe systems prior to starting your installation
