

PRECISION CIPP

Short Inversion

Cannon & Backshooter

Launch Package

INCREASE PRODUCTIVITY WITHOUT INCREASING COMPLEXITY

PRECISION CIPP

Designed for
2"-6"
Liners

Proudly
Made in
America!

Designed for efficient installation of 2"-6" liners, the **Cannon & Backshooter** Package enables your team to complete more work with smaller crews.

Steam Cure Technology

The speed of UV without the price tag

Reduced Labor

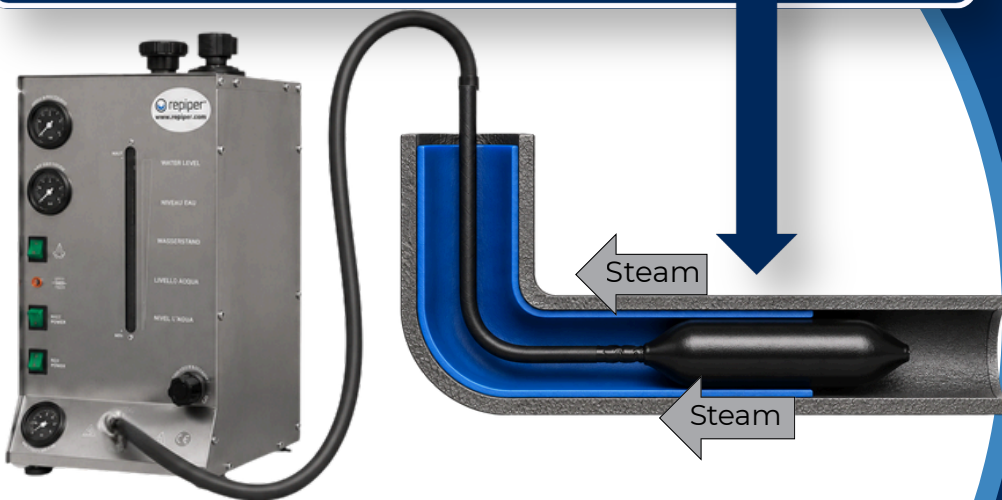

Cannon mobility allows a 2 person crew to accomplish a historically 4 person job

Cure with Confidence

Engineered for durability and long-term reliability

Steam is released in reverse, so curing begins at the furthest point of the liner, providing confidence that the entire installation is fully cured when curing is achieved at the extrusion point.

Cannon

- Mobility allows precise shots in tight spaces
- Shoot 2" diameter with ease
- Varying tip sizes to handle any diameter

Backshooter

- Easily navigate turns in hard to reach areas
- Steam is applied at furthest point, ensuring easy confirmation of cure
